Community/Residential Support Internship

This placement would offer students the opportunity to work within our Community Integration Manager (CIM) and/or Residential Mentoring & Support Staff (RMSS) team and gain direct experience providing therapeutic community and residential support to clients in treatment at our practice. Students could be involved in a number of individual, group and team based activities as a part of this training.

Placements may include the following:

- Working individually or with one of our CIMs or RMSS to provide direct individual support to clientele.
- Co-facilitation or facilitation of pro-social, life/relationship skill building group programming. Such groups may include:
 - Recreational Program
 - Horticultural Program
 - Volunteer Program
- Co-facilitation or facilitation of pro-social, life/relationship skill building programming within a residential setting at our Healthy Homes.
- Assisting in the delivery of Indigenous Traditional support and healing group programming.
- Special projects, such as developing/enhancing community connections and resources, and research.
- Attending team meetings and participating in clinical case conferences.

Practicum placements can be individualized based on the interests, skills, and qualities of each student.
